■ Swimming pool ceramics from GAIL – sustainable by tradition

We are delighted to provide you with our catalogue for our swimming pool ceramics and cordially invite you to find out more about our products and solutions.

Our swimming pool ceramics combine long-lasting aesthetics with high resistance and unique product properties that artfully design and protect the walls, floors and facades of your swimming pool project. Our products also offer maximum functionality and give every planner unlimited possibilities to realise their design ideas.

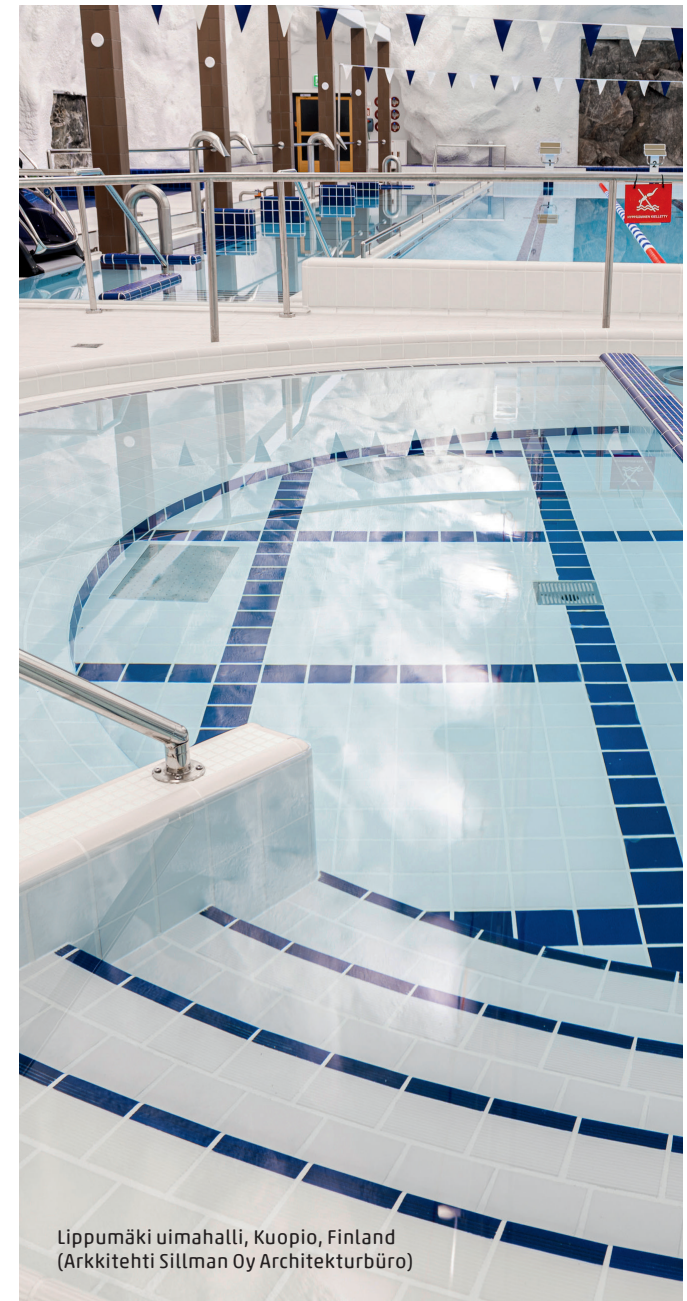

Sustainable natural raw materials are a matter of course for the production of our high-quality tiles and guarantee a resource and environmentally friendly process, from the procurement of raw materials and production through to the utilisation and use of recyclable packaging and other materials.

In short: We make an important contribution to the sustainable architecture of your swimming pool project!

Architects, planners, builders, trade partners and general contractors around the world rely on the quality of our products to realise swimming pool projects that meet the highest standards. If required, we can work with you to develop customised system solutions for - virtually - any swimming pool project. Our technical service will accompany you throughout the process.

We are proud that Gail's robust architectural ceramics are appreciated worldwide and are successfully used in prestigious reference projects around the globe. We are happy to use our expertise and our products to help create successful swimming pool projects that inspire builders, planners and users.

Your GAIL sales team.

Reha Klinik Pankow, Germany

Collection MOSAIC

Glazed dry-pressed mosaic tiles,
glued on net, with glossy, matte
or slip-resistant surface

according to DIN EN 14411 Bl₆

Examples of appropriate fields of application:

- swimming pools
- public, industrial and commercial property
- private residential construction
- and much more

Collection MOSAIC

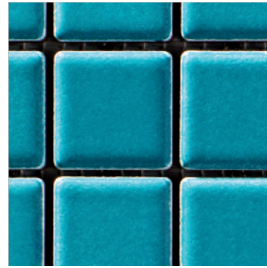

Our main colours

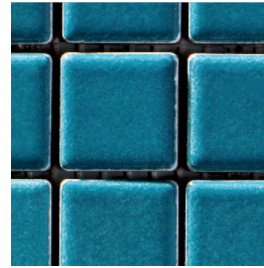

22908 White, matte

Useful information

Collection »Special-Form« is also available in all colours of collections »Combi-Color I« and »Combi-Color II« upon request.

Poseidon Therme, Ischia, Italy

The »Finnish Channel«

Calm water levels and good visibility:

The main feature is the inclined level rising from the pool wall towards the overflow channel and the grooved hand-grip tile with safety markings. The water runs up like on a beach and the water level quickly calms down as a result. Further advantages: (a) water level at or above the level of the pool deck, (b) excellent visibility for bathers and pool attendants, (c) no chlorine blanket above the pool, so no unpleasant odours, (d) cleaning the drainage channel from the pool deck, and (e) savings on excavation and concrete work, as the pool can be up to approx. 30 cm lower with the same water depth than with a so-called low-lying water level with a channel inside the pool.

The »Zurich Channel«

Wider pool surround and less construction work:

A pool edging tile serves as an overflow edge, with a directly adjacent overflow channel or an overflow channel behind it. The water level is at or above the level of the pool deck, which provides excellent visibility and no odour nuisance from chlorine. The pool deck can be used from the edge, and excavation and concrete work are comparatively inexpensive.

The high level »Wiesbaden Channel«

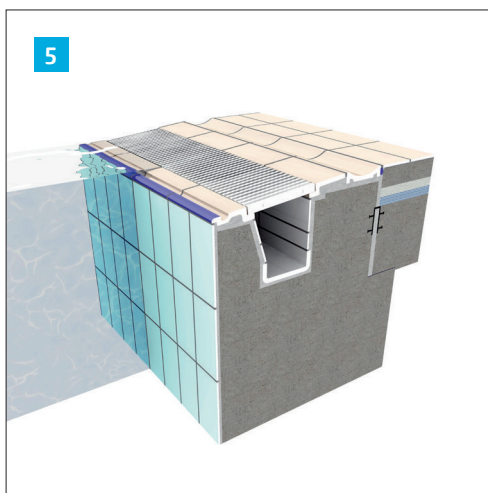

Good grip for swimmers and easy-to-clean:

A typical feature is the overflow channel with its dual purpose protruding edge that acts as an overflow and handhold in one. The water level here is also at or above the level of the pool surround, and there is no chlorine blanket. Equally important: the pool edge has good holding options for swimmers, the drainage channel can be cleaned from the pool deck, and full use of pool deck is available from the edge. Here, too, there is potential for savings in the shell construction.

The low level »Wiesbaden Channel«

Good wave breaking and ideal for renovation of historic baths:

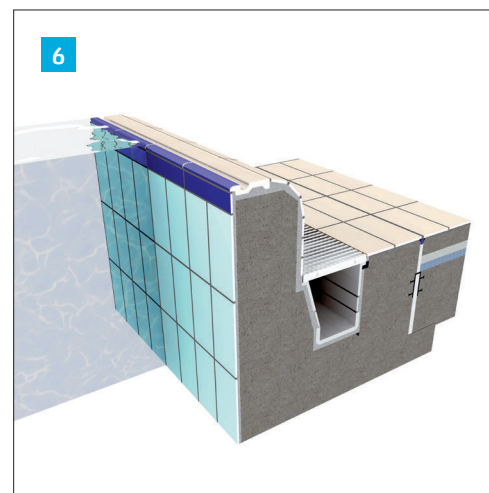

This system consists of an internal overflow channel located approx. 0.30 m below the pool deck. As a result, the water level is lower. The most important advantages of this system: good wave breaking due to the sloping tile, good holding options on the channel lip, clearly visible markings, and good attachment options for lane ropes.

The »Finnish Channel« with grating rest

Customisable channel dimensions:

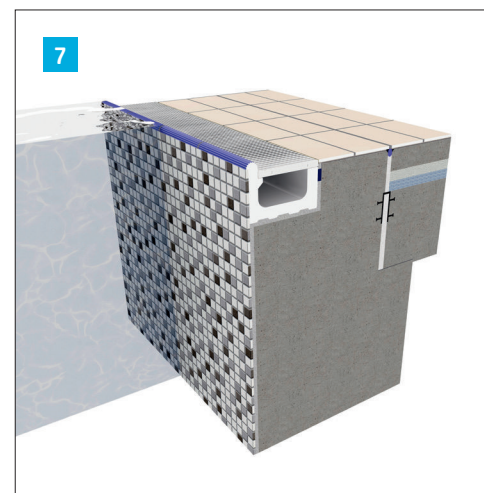

A grip tile with a double function opens up a great deal of freedom to design the drainage channel individually in terms of width and depth. This is because the moulded part also serves as a support for the cover grate. A shallow channel behind the pool head also supports drainage.

The »St. Moritz Channel«

Good visibility thanks to high water level:

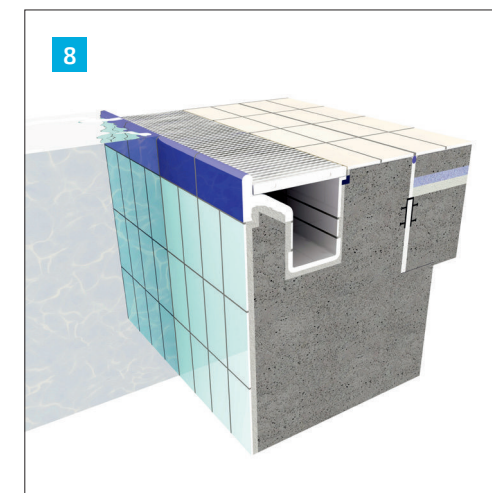

The St Moritz channel is characterised by a raised pool wall over which the water flows into the surrounding channel. The high water level allows a view far beyond the edge of the pool, making the St Moritz channel particularly suitable for the design of therapy pools as well as hotel and leisure pools. Because the pool requires less excavation, the construction costs are also reduced.

The »Wiesbaden Channel« with recess

Greater freedom for designing pool walls:

An additional recess on the tried-and-tested Wiesbaden Channel creates space for lining the basin with mosaic tiles. This opens up unlimited possibilities for planners and builders to create individual colour schemes. A contemporary symbiosis of function and design!

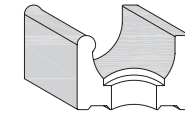

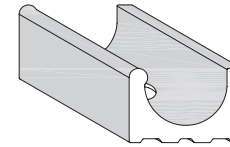

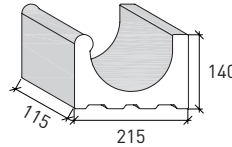

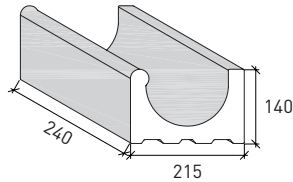

The »Berlin Channel«

Low drainage noise and more flexibility:

The Berlin Channel consists of an inclined gutter stone, which also serves as a grate support and hand grip. The inclination of the gutter stone reduces the noise of the draining water. The height and depth of the gutter can also be flexibly designed.

■ Design and tiling plans

GAIL supports planners and architects with design proposals and detailed laying plans. Many prestigious buildings worldwide have been realised in collaboration with our planning department.

All information on dimensions, weights, packaging, colours, price groups etc. is given in good faith and to the best of our knowledge. We reserve the right to make any changes that may become necessary after the catalogue has been printed, for whatever reason, and without prior notice. We accept no liability for this and our liability derived from this is completely excluded. The written details in our respective order confirmations always apply.
